

## Description

### CORN HARVESTER

The Corner Machinery silage harvester supports high efficiency with low power for all moving parts of the machine. Fodder can be met in more inexpensive and more healthful ways through Corner Machinery, Silage Harvesters with Transmission.

Thus your machine works for years without ever damaging the tractor.

The machine is mounted to the tractor through 3-point hitch hydraulic system. Through the shifting of coupling lever, tractor is easily able to adjust furrow or furrow width on the field. The significant aspect on the silage harvester is the sharpness of chopper blades. Hardened blades of special steel alloy on our machine can be sharpened by a blade sharpening system in a short time. Chopper blade unit can be reached without effort through a simply-opening funnel system, and required blade adjustment is comfortably done.

## TECHNICAL FEATURES

	<b>CM-1447</b>
Length / mm	2500
Width / mm	2300
Height / mm	3500
Working Width / mm	700
Working Capacity / ton/hour	35
Weight / kg	600
Tractor Power / Hp	50
Working Speed / km/hour	10
Shaft Rotations / min-l	540
