

Description

Fertilizing spreader gives high quality of productivity in different areas.

To clamp together the fertilizing spreader there is 3 point hydraulic hanger system of tractor is used.

Fertilizing spreader has 1 or 2 planting disks. The frame of planting disks is covered with large size of protecting signboard. So, it reliably protects the colored frame and hopper. So, continuous service of that machine become longer.

The structure of fertilizing spreader is suitable for the next criteria:

- Easy usage and perfect accuracy
- Center of gravity is close to tractor
- The same deviation of all width at normal and limited fertilizer
- Minimum service
- Easy in setting
- High productivity

STANDART FERTILIZER SPREADER
